

Assignment on Tableau

Description

Imagine that you are working closely with the director of sales of an e-commerce company who has asked you to design a Tableau Dashboard with relevant KPIs. A colleague helped you retrieve a dataset for you to work with. The dataset is added along with.

Objective

Design a dashboard using Tableau, that shows relevant KPIs based on the dataset provided. The choice of KPIs is also part of the case study evaluation. We would like to see how you interpret, clean and display data.

Please note

Publish the dashboard in Tableau public and share the link in Paatshala.

While submitting the link, you can also provide a brief note describing what/why you did in the dashboard.
